2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:
D1 = KR 2000-58970 A

Claims 24-33 are a method and a system for constructing a multimedia database by indexing multimedia data, and a method and a system for providing a multimedia data search service using a multimedia database.

The said claims are related to 1)receiving the location information of each semantic unit, which is a smallest unit for searching for multimedia data, including a start point and an end point, 2)receiving a keyword for each semantic unit or extracting a keyword from each semantic unit of the multimedia data, 3)storing keywords together with their corresponding semantic unit's location information, 4) searching for a semantic unit of a selected search unit level having the same keyword as the input keyword.

D1, being regarded as closest prior art, discloses a method for providing and searching motion picture information to index all the items, comprised in one or a plurality of motion pictures, in keywords. All the information of items, such as figures, properties, music, sound, events, time, contents, explanation, etc., comprised in one or a plurality of motion pictures and all the lifetimes, a time period from the appearance of an item to disappearance of the item, are indexed. The term "Lifetime" is corresponding to the start point and the end point of the semantic unit in the present invention. D1 discloses the example of searching a scene or a time period including 'car' or 'motorcycle', which is corresponding to the search based on keywords in the present invention.

Therefore, the subject matter of claims 24-33 does not involve an inventive step.
